Artist Statement

Creating my basketweave, I had the inspiration from nature and the colors it has to show us. All the greens and browns you will see in the summertime when mother nature is at its finest. I added the two leaves on each side of the piece, with a Sprig mold I created, and the center of the leaves was a mold I made of a button, just to have as a detail on the piece. This creation was one of my personal favorites because of having to figure out the weaving of clay slabs. It was a bit difficult at first, but a beautiful piece in the end.
