## Artist Statement

This piece is inspired by Claude Monet's painting *'The Artist's Garden'*. I chose this piece as my inspiration because of the array of colors and textures that this painting has. I thought that it would be interesting to translate this painting into a ceramic piece and make it come to life. I loved the process of creating this piece and being able to interpret this painting in my own way. Although I followed the painting closely when it came to colors and the background, I decided to accentuate the three-dimensional aspect of this project by adding detailed flowers to the foreground of the scene.
