Williams Valley High School, PA.

Why I Chose Jake Cogle

This is my first time having Jake in an art class. In the short amount of time I have had him in class, he has proven to have amazing technical skills and an endless font of ideas for his 3D Design projects. He has shown tremendous growth throughout his time in art both technically and personally.

Artist Statement

I wanted to create something fantastical for my piece and love working with recycled materials. I chose to depict two creatures in the throes of a battle where either side could win, showing how quickly the tides could turn for either side of the fight.
