

Aristotle Dunlavey, Grasshopper

Coudersport High School, PA.

Artist Statement

My work often consists of people. I enjoy capturing human nature with mythological aspects. I love making stories and I am able to express them through my art. I often draw traditionally with pencil and paper, my secondary medium is digital art. The ability to make this art is what I live for and makes life very fun because it connects me with like-minded people.

Benefits from Art Classes

Throughout my high school career, I have taken a plethora of art classes. I have learned many different mediums that range from painting to basket making. These classes have given me many new skills and abilities. It has also given me a deeper understanding and appreciation for the different mediums and styles of art. Art classes have given me a chance to express myself and to further refine my skills. They have also helped me form a deeper connection with my friends and community.
