## Artist Statement

I have benefitted from art class and my art teachers in many ways. Art class is key to learning how to problem solve while also coming up with a solution unique to you and who you are. Art class really helps to portray who you are and how you view the world and yourself. Art teachers are amazing because they offer guidance, support and structure while also letting their students express themselves.

For the “Art” part of the coil pot I did a few things, the thing that stands out the most is my snake attachment. I am very pleased with the shape of the snake as well as how it goes above the rim making it visible from all angles. Some of the other creative aspects are the detailed glazing I did on the inside of my pot. My pot is uniquely mine because of the snake element. I love reptiles and want to portray that in my art. If I were to complete this project again, I would have cleaned up the underside of my snake better when I attached it. I think I glazed my pot very well and used a unique color pallet.
