## Why I Chose Sydney Pricher

I chose Sydney's work because of how he worked with the watercolor instead of working against it, which led to two beautiful paintings. He demonstrates control of the medium in certain details and leaves the rest to blend together naturally. It was apparent that he understood the layering techniques I demonstrated, as the final pieces have a lot of depth to them.

## Artist Statement

As an artist, much of my work centers on landscapes. I find that a landscape can represent a specific moment in time and almost act as documentation of different phases of life. I've included two of my landscapes in this show, each one representing places I consider home. I like to experiment with texture and abstraction, particularly when using watercolor.
