## Artist Statement

In my life, art has always been something that I could depend on. I like that there are no rights or wrongs, just creation and a way to communicate thoughts and emotions. The art classes I have taken have benefited me because they have been an outlet for expression. Under the guidance of my teacher, Mr. Corwine, I have been able to learn how to effectively use my creativity to make functional pieces of art that I can implement in my daily life. When I am in art class, I do not have to worry about the stress of other classes, and it is just a very therapeutic time.
