## Artist Statement

While taking Ms. Rosario's art classes, I have realized that it is okay to take my time on my projects and how it benefits my work. When taking art classes under other teachers I always felt rushed and as if quantity were more important than quality. Also, while taking pottery classes I discovered my love for sculpting and am hoping to make characters for Claymation films one day.

Ever since I was little, I always knew I wanted to do something with my life involving art. I come from a very artistic family, my parents actually met in art school, and grew up comparing my art to my family's and hoping that one day I would be as good as them.
