Mansfield University of Pennsylvania
Health and Safety Plan

Introduction

In response to the continuing COVID-19 pandemic, Mansfield University has developed a Health and Safety Plan (Summer/Fall 2021 Plan) for students, employees, and visitors. The Plan has been developed in accordance with published health and safety guidelines from the Centers for Disease Control and Prevention (CDC), the Pennsylvania Department of Health (DOH), and the Pennsylvania Department of Education (PDE). The university will continue to evaluate and update the plan as conditions require and as further research, data, and resources become available.

Mansfield University’s goal is to support all students’ progress toward their degrees while we mitigate the health and safety risks associated with the COVID-19 virus for students, staff and the community.

Based on the unique circumstances resulting from the COVID-19 pandemic, Mansfield University will comply with the State System collective bargaining agreements, policies, procedures and standards as new health and safety guidelines are developed.

It is recommended for all Students and Employees to
- Familiarize themselves with all university COVID-19 protocols and requirements.
- Follow the guidance information in this plan to reduce the spread of the COVID-19 virus.
- Support and encourage the campus community to actively participate in mitigation activities such as receiving the COVID-19 vaccine.
- Focus on small gatherings for limited timeframes to reduce the possibility of the spread of disease.
- Limit unvaccinated visitors to campus and residence halls.

Social Compact for Health

The single most important factor in promoting a safe campus environment is compliance with protective behaviors. We must all take extraordinary steps to stay well and protect each other. To this end, it is critical that all university employees, students, and visitors embrace a shared commitment to undertake protective measures, both on campus and off campus. The provisions of the “Social Compact for Health” are necessary to keep the entire campus community safe by controlling the spread of COVID-19 and other potential infections. Individuals who do not abide by the Social Compact for Health and the provisions for safety stated elsewhere in this document may be asked or directed to leave campus.

1 CDC: Considerations for Institutions of Higher Education
2 DOH: COVID-19 Resources
3 PDE: Resuming In-Person Instruction at Postsecondary Education Institutions and Adult Education Programs
Employees and students who are directed to depart campus for failure to comply with these guidelines may also be taken off duty and/or subject to disciplinary action as outlined in applicable collective bargaining agreements and the Student Code of Conduct.

- **Traveler Testing:** As of March 1, 2021, the Order of the Secretary of the Pennsylvania Department of Health for Mitigation Relating to Travel is no longer in effect. Travelers should still practice appropriate public health measures to slow the spread of COVID-19 such as masking, physical distancing, and hand washing hygiene. For any updates refer to the [PA DOH Guidelines](https://www.doh.pa.gov/PublicHealth/COVID-19/). For those who reside outside of Pennsylvania, please refer to your state’s guidance.

- **Social distancing:** As used within this guidance, social distancing refers to individuals who are not fully vaccinated being physically separated from one another by at least six feet. It is expected that unvaccinated individuals will always maintain social distancing, whether on- or off-campus, and adhere to markers, signs, and other guidance pertaining to maintaining the appropriate physical distance. It is important not to congregate in large groups during non-instructional activities, if participants are not fully vaccinated.

- **Wearing of face coverings/masks:** Experience demonstrates that when in public settings, face coverings reduce the spread of COVID-19. Face coverings should cover both mouth and nose with material that is secured to the head. Information guiding the usage of face coverings is changing and attention needs to be maintained of the latest updates and recommendations.
  
  - Masking is required, if an individual has not been fully vaccinated (2 weeks after second dose of vaccine). Masking for unvaccinated people is required for all indoor and outdoor spaces.
  
  - Face coverings may be removed in the following circumstances:
    - while eating and drinking.
    - if wearing a face covering will create a safety hazard (obstructing vision) while operating equipment.

- **Masking should be considered in areas where large gatherings of people are in confined or limited space.**

- **Individuals unable to wear a face mask due to a documented health condition or disability must register for an accommodation as described below in Section 1.** Additional information on considerations for wearing masks can be found on the [CDC website](https://www.cdc.gov/coronavirus/2019-ncov/). By continuing to use the university’s facilities, employees and students agree to follow the guidelines and restrictions as outlined above.

- **Alternative to a face covering:** A plastic face shield that covers the nose and mouth, extends below the chin and to the ears, and leaves no exposed gap between the forehead and the shield’s headpiece. The CDC has advised there is currently not good evidence to determine the level of protection a face shield provides. Face shields may be an option in situations where wearing a cloth face covering is not otherwise feasible. Faculty may wish to wear a face shield in lieu of a mask while lecturing.

- **Personal and university-sponsored travel:** It is strongly recommended that all individuals refrain from personal travel to areas where there is increased risk of COVID-19 infection. All university-sponsored or university-related travel must be reviewed and approved in advance. University travel restrictions will follow any guidance provided by the CDC/PA Dept. of Health.
o Monitoring, surveillance, and reporting: Employees and students should self-report any symptoms or exposures to the Director of Environmental Health and Safety if they have knowingly been exposed to anyone who has tested positive for COVID-19. Additional information on procedures for suspected or actual exposure to or manifestation of symptoms of COVID-19, as well as protocols in the event of confirmed cases on campus, is included in the university’s COVID-19 Quarantine and Isolation Policy. Any student residing on campus will be required to leave campus if they are a confirmed exposure or a confirmed case of COVID-19 to complete the assigned quarantine/isolation requirements. Students, staff, and faculty are not to enter university buildings if they are under a quarantine/isolation time period. Students should consult with their faculty member regarding the best way to stay current with assigned course work while completing the required quarantine/isolation period.

o Eating and drinking on campus: Individuals who are not fully vaccinated should continue to wear face masks while inside university buildings including dining facilities. Because of the masking requirements in the university buildings, meals should be eaten only in the designated dining areas. Eating or drinking is prohibited in any of the university classrooms. Masks may be removed for eating, but social distance must be maintained when seated indoors and outdoors. When unvaccinated diners leave their table, masks must be put back on, covering the nose and mouth. Dining services has posted additional guidelines in the Student Restaurant-Upper Manser Dining Hall, Lower Manser Food Court, Mountie Coffee (Alumni Hall), Mountie Munchies (Grant Science Center) and Mountie Market (Spruce Hall) areas.

Section 1: Campus Life – Academic, Student, and Employee Life on Campus

All university employees, students, and visitors are expected to follow the provisions of the “Social Compact for Health,” as stated above, to keep the entire campus community safe, to be responsible for their own personal health, and to be respectful of the health of others. It is only within this context of mutual respect and cooperation that we can resume in-person instruction and activities on our campus.

1. Course delivery: Mansfield University will transition back to primarily face-to-face instruction for the fall 2021 semester. All face-to-face courses will follow the protocols outlined in this Health and Safety Plan, which includes the wearing of face coverings and the appropriate physical distancing based on vaccination status.

   • In-person instruction: Traditional, in-person classroom instruction is anticipated for most classes during the fall semester. If necessary, these classes may be offered in reconfigured lecture rooms and/or larger venues that accommodate physical distancing. Students and employees engaged in face-to-face instruction must follow all the necessary health and safety protocols as noted above.

   • Remote/hybrid instruction: Because Mansfield University offers several fully online degree programs and programs with online pathways, we will continue to offer a selection of courses via distance education. Such courses may be offered asynchronously or with synchronous activity. If the course includes synchronous activity, then the class will meet online, typically
via Zoom, during the designated class days/times each week. If the course is delivered asynchronously, then the course does not include synchronous, online class meetings. Students should consult their schedules in the Student Self-Service portal to determine if their online classes include synchronous meeting times.

- **Clinical experiences, field experiences, and internships:** In-person work experiences such as clinicals, student teaching, and internships may resume, if permitted by the host agency and appropriate safety protocols are in place. If the host site does not permit in-person experiences of this kind, then faculty will work with the students to find a remote alternative, if appropriate.

- **Contingency planning for instruction:** If the pandemic conditions change—either before or after the first day of classes—the university may need to shift in-person courses to remote delivery, temporarily. Please note that the university may curtail or suspend in-person instruction independent of any actions taken by local, state, or federal agencies.

**Academic calendar:** The Fall 2021 semester will begin on Monday, August 23. Classes will end on Friday, December 3. Finals Week is Monday, December 6, through Thursday, December 9. There will be no classes on Labor Day (September 6) and Fall/Thanksgiving Break (November 23-26). Additional details and deadlines may be found in the Fall 2021 Academic Calendar Summary.

1. **Athletic competition:** The Board of Directors of the Pennsylvania State Athletic Conference (PSAC) will determine conference-mandated scheduling of sports. The Conference will also evaluate necessary schedule changes. Changes to championship schedules are available on the PSAC website.

2. **Athletic Event attendance:** All spectators are expected to adhere to PA State guidelines and the Mansfield University Health and Safety Plan. Spectators are not allowed on the field/court/track post-competition to interact with student-athletes. Those interactions must occur off-site.

3. **Residence Halls:** On-campus housing is open for all students. The University is requiring all students living in the residence halls to complete a rapid COVID test and receive a negative result prior to moving-in for the fall semester; or provide a negative test result from within 72-hours of arrival, if they have not been fully vaccinated. Following the guidance of the PA Department of Health, if a student shows proof of being fully vaccinated for the COVID-19 virus, they will not be required to test. Random testing may be requested from students in the residence halls. Students are expected to participate in regular testing, if not fully vaccinated.

Revised housing policies with added precautions will be in effect for the health and safety of students living in on-campus housing. All students living on-campus will be required to sign a Housing Agreement Addendum for the fall 2021 semester, this includes returning students who have previously signed an addendum.
Visitors in the residence halls will be limited to (2) visitors per residential student. Visitors who are not fully vaccinated are required to wear face masks, at all times. If a student living in the residence halls is not fully vaccinated, they are limited to (1) visitor, and masks must be worn at all times in the residence halls. Except when in their own rooms, but must wear mask in one’s room if not vaccinated and a visitor is present. Failure to comply may result in student conduct violations and/or loss of student housing.

4. Resident students will be housed with roommates, as originally selected in their housing application. However, private bedrooms will be made available to students at the single room rate, by request and space permitting. Cleaning staff will be cleaning common spaces more frequently and using disinfectants instead of general-purpose sanitizers. Cleaning frequencies are increased on high touch surfaces such as door handles, push bars, and elevator buttons. Move-in and move-out schedules will be spread out to reduce density and adhere to social distancing requirements.

5. **Residence Hall Community Rooms:** Community rooms within the residence halls will be available for limited activities on a scheduled basis. The rooms will be closed between 10am-noon each day for cleaning activities. Any activities must adhere to the distancing and masking requirements and be limited to one hour in duration. Equipment used should be cleaned with disinfectant products upon completion of activities (game equipment, TV’s, tables, kitchen equipment, etc.).

6. **Mansfield Dining:** Dining operations will resume at the beginning of the fall semester when the campus resumes normal operations. Seating will be available in the provided dining areas, allowing for continued social distancing in the dining environment. More remote options such as carry out will also be available. Individuals who are required to wear masks should wear them while entering, exiting, or otherwise traveling throughout the dining or retail food service area. Face coverings may be removed while seated. Additional guidelines are posted in the dining areas.

7. **Transportation:** The Mountie Express, a service of BeST Transit, provides on-campus operations. As a regional provider of transportation, all riders will need to abide by restrictions imposed upon mass transit carriers and the River Valley Transit. Routes and hours of operation will be posted throughout campus and through the BeST Transit phone app. Hours are subject to change. Masking is still recommended in public transportation.

8. **Campus Academic Travel/Field Experiences:** The following concepts will be implemented: Fewer People, Shorter Trips, Increasing Distance Between People and Hand Washing Hygiene. All passengers and drivers should be aware of the symptoms of the COVID-19 infection. If a passenger or driver is having signs of COVID-19 infection, they should not participate.

The large vans owned by Mansfield University will be available for academic and other approved university programs. Travel should be limited to the least amount of time possible to complete the trip.
Limited occupants – (30% reduction). If individuals are traveling within the group are not vaccinated the maximum occupancy listed below will be followed to decrease the exposure and limit the group to 10 people or less.

- 15 Passenger – Limit of 10 Passengers (driver included)
- 12 Passenger – Limit of 8 Passengers (driver included)
- 11 Passenger – Limit of 8 Passengers (driver included)

The scheduled trip should take the least amount of time possible with no stops along the route unless an emergency occurs. The vehicle ventilation system shall be used along with providing fresh air with open windows during the trip. Hand sanitizer is recommended before and at the conclusion of any trip.

The van will be disinfected between trips with cleaning materials. The driver and passengers of the vehicles are expected to clean the vehicle upon completion of the trip.

No passengers or drivers shall travel if ill or experiencing symptoms of COVID-19.

9. **Fitness and recreation activities:** Fitness and recreation facilities, such as the Kelchner Fitness Center, will open at regular occupancy per DOH guidelines. It is expected that all safety measures, including, but not limited to, those provided by state and federal guidance, will be strictly followed. Use of the facility is open to students, staff, faculty, approved guest passes and daily passes. Face coverings will be worn by those patrons who are not fully vaccinated. Additional guidelines and restrictions will be posted at Kelchner Fitness Center.

10. **Student extracurricular and co-curricular activities:** Face-to-face student activities and events may be limited and will adhere to social distancing and other applicable safety guidelines provided by state and federal agencies. Student organizations are required to complete the event health and safety forms and report the attendance to the Environmental Health & Safety Office within 24 hours of conclusion of the event.

11. **Accommodations:** Employees seeking accommodations due to documented high risk factors will submit their requests using a process to be determined by the State System. Updates regarding the process will be provided as more information becomes available. Students seeking accommodations for the same reasons should contact the Office of Services for Students with Disabilities.

- **Disabilities:** In conjunction with Mansfield University’s Health and Safety Plan, the Office of Services for Students with Disabilities (SSD) will continue to provide support and accommodations via university policies and procedures to students through COVID-19 risk-mitigating measures. The SSD Office will connect in-person with students while maintaining physical distancing within the office environment. Face masks will be worn during meetings by those that are not vaccinated, and hand sanitizer will be provided. Any meetings for more than two people will require use of the conference room to ensure appropriate distance between individuals. The SSD Office will support students both online and within the campus environment for the review of disability
documentation and implementation of accommodations. Accommodation requests per COVID-19 will also be reviewed and accommodated, as necessary. The SSD Office can shift all procedures to an online environment and according to any state mandates, if necessary. Testing accommodations will be provided within a proctored classroom environment in South Hall for appropriate physical distancing on days where more than two students are testing. The Office of Services for Students with Disabilities remains committed to equal access and inclusion of students with disabilities. The SSD Office can be reached via email at: mphillip@mansfield.edu. Consult meetings can be scheduled as needed via email or by phone at (570) 662-4691.

- **Counseling:** The Counseling Center will provide in-person and online counseling during the fall semester. Physical distancing will be practiced in the waiting room and during in-person counseling sessions. Masks are required to always be worn if unvaccinated and hand sanitizer will be made available. Should a student be unwilling or unable to meet face-to-face on Mansfield University’s main campus, counseling will be available via HIPPA-compliant Zoom. The Counseling Center can shift all procedures and services to a virtual format, according to HIPPA, CDC, DOH, PDE, PASSHE and state guidelines, if necessary. Registered students may contact the Counseling Center at (570) 662-4436 for more information or to make an appointment.

**Section 2: Healthy Strategies for Mitigating Transmission**

1. **Hygiene (CDC) requirements:** Individuals should wash their hands often with soap and water for at least 20 seconds. If soap and water are not readily available, hand sanitizer that contains at least 70% alcohol can be used. Individuals should avoid touching their face and using their hands to cover coughs and sneezes, and instead use a tissue or the inside of their elbow. Used tissues should be thrown in the trash and hands washed immediately with soap and water for at least 20 seconds or use hand sanitizer.

2. **Personal protective equipment and provisions to support a safe environment:** Face masks and hand sanitizer are a basic level of protection that everyone on campus should have readily available. Additional face masks and hand sanitizers may be available for purchase in The Mountie Spirit Store (Alumni Hall) and through other retailers. Students are encouraged to bring any additional personal provisions with them as part of move-in day. These provisions may include disinfectant wipes, cleaning supplies (sanitizing spray and towels), additional face masks, and disposable gloves. Hand sanitizer refill stations will be located across campus. Refer to the FAQ’s on the COVID-19 website for locations.

3. **Social distancing and gatherings:**

   a. **Social distancing:** As used within this guidance, social distancing refers to individuals being physically separated from one another by at least six feet. It is expected that all individuals who are not vaccinated will maintain social distance, at all times, whether on- or off-campus and wear face coverings.
b. **Non-instructional gatherings and campus events**: Students should limit large group activities in spaces with limited ventilation. Virtual group events, gatherings, or meetings should still be considered as some students may not be comfortable meeting in face-to-face group activities. All non-academic/instructional gatherings are limited based on social distancing guidelines. Occupancy in some buildings may be limited and signs will designate where such limitations exist.

4. **Campus environment modifications**: Employees, students and visitors will experience signage reinforcing healthy practices while on campus, including but not limited to hygiene, sanitation, face coverings on campus, and social distancing interventions. The allowable number of people per room, classrooms, and common spaces will be reduced. Classroom desks may be rearranged to maximize the space between students and to reduce the possibility of transmission. Plexiglass shields will be used in student service areas where face-to-face services support student needs, such as North Hall Library. Some appointments with student service offices, such as Financial Aid and the Registrar, as well as faculty appointments, may be conducted through online or virtual meetings to reduce face-to-face interactions. Email, chat, and phone calls may also be encouraged depending on the circumstances.

5. **Campus Clinic and Health Services**: The Mansfield Campus Clinic will remain open for students and will employ COVID-19 specific protocols when providing health services, to reduce the density of patients awaiting care. Students are required to call ahead for appointments at (570) 662-4350. Employees are strongly encouraged to access health services with their health care provider. The Campus Clinic for students is open Monday-Friday, 8:00 a.m.-4:00 p.m., when the campus is open.

6. **Requirements of Employees - Work schedules**:
   Where, when, and through which modality employees perform their duties is at the discretion of the university president or appropriate designee, unless otherwise set forth in applicable collective bargaining agreements or policy. Any request for a departure from the assigned work function, schedule, location or modality may be considered only when the procedures below are followed:

   a. Faculty and staff who wish to seek an accommodation or a modification of their current accommodation under the Americans with Disabilities Act (ADA) are directed to submit their request to Human Resources. Employees are urged to contact Human Resources as soon as possible.
   b. As required by the ADA, if a medical condition is deemed a disability as defined under ADA, then a reasonable accommodation, if available, should be provided.
   c. Faculty and staff who do not have a disability as defined under the ADA, are expected to return to the university campus as of June 1, 2021. If a concern is identified in the employee work area that does not allow for social distancing, employees should work with their supervisor to rearrange the work area. Additional guidance may be obtained from the MU Environmental Health & Safety Office.
   d. Flexible work arrangements may be available based on the guidance from the CDC/PA.
Department of Health based on the progress of the COVID-19 pandemic, or a modification has been approved per Section 6 Item #a.

e. Please note that changes to course modalities, room locations, and meetings may be implemented due to physical distancing requirements and other risk-mitigating measures as explained in Section 1, above.

7. **Requirements for all visitors to campus**: All visitors and guests must comply with the previous stated rules for employees and students. Visitors who are exhibiting symptoms, or who have been exposed should not come to campus for any reason.

8. **Flu vaccinations**: All students, employees and visitors are strongly encouraged to get the seasonal flu vaccine. Vaccination is particularly important for people who are at high risk of serious complications from influenza. The seasonal flu vaccine is effective in preventing some of the most dangerous types or to reduce the severity of the flu. To be clear, the influenza virus is a different virus from COVID-19 and getting a flu shot will not protect you from COVID-19. However, both viruses are spread in the same fashion, and a seasonal flu vaccination will reduce the likelihood of self-isolation, quarantine, and additional pressures being added to the local health system.

9. **COVID-19 vaccinations**: A COVID-19 vaccine is currently available from multiple manufactures. All individuals are strongly encouraged to receive the COVID-19 vaccine for the health of themselves and of those within the campus community. The university is coordinating to make the vaccine available to the campus community during the beginning of the fall semester.

**Section 3: Monitoring Campus Health**

The COVID-19 Quarantine and Isolation Policy outlines the university’s, and an individual’s, roles when circumstances require the individual to isolate due to suspected or actual exposure to, or manifestation of, symptoms of COVID-19. The policy is based on the current information and guidance from the CDC and the PA Department of Health. Updates will occur if changes in the guidance are issued.

1. **Exhibiting symptoms and self-reporting**: Any university faculty, staff, student or volunteer who is currently living, working, attending face-to-face classes, or interacting regularly with students on campus, should self-report any symptoms to the Director of Environmental Health and Safety under the following conditions.

   **For individuals exhibiting symptoms**: People with COVID-19 have a wide range of symptoms reported. Symptoms may include:

   - Fever > 100° or chills
   - Cough
   - Shortness of breath
   - Loss of smell or loss of taste
Muscle or body aches
Headache
Congestion or runny nose
Nausea or vomiting
Diarrhea

Additional information can be found at -

Anyone experiencing symptoms:

- Must self-report symptoms and exposure to the Director of Environmental Health and Safety.
- Must not report to work, class, clinical assignments, or attend or participate in institution-sponsored activities or events.
- Must not enter campus buildings.
- Must quarantine for 10 days off-campus, at home, and follow additional university or state DOH guidance. Mansfield University is unable to provide isolation and quarantine services during the fall 2021 semester.
- Participate in campus COVID-19 testing.

For individuals who may have been exposed to COVID-19:

- Report to the Director of Environmental Health and Safety, if you have been exposed to an individual with a confirmed case of COVID-19.
- Follow the PA Department of Health guidelines for COVID-19 exposure
- Quarantine for 10 days, off-campus, and follow additional university or state DOH guidance. Mansfield University is unable to provide isolation and quarantine services during the fall 2021 semester.

Cleared to return to campus to work or reside: Any individual that has tested positive for COVID-19 shall follow the PA Dept. of Health guidance and university policy for isolation prior to returning to campus.

2. Testing: Mansfield University will facilitate the testing option for students, staff and faculty throughout the regular semester and communicate the availability during the semester. Testing is encouraged for the campus community, as it is an important component to the ongoing campus health.

- Entry screening testing – Testing of students returning for the fall 2021 semester will be required for students living in the residence halls. The testing will occur on campus during the first week of the semester. If students have been fully vaccinated, and provide the proof of vaccination, they are not required to test for the COVID-19 virus, as long as they are asymptomatic.
- Regular screening testing - Ongoing testing of random and targeted selections of students will occur throughout the semester.
- **Student athlete testing** – Students who are participating in athletic competition during the semester will participate in required testing based on the NCAA guidelines and the MU return to play guidelines.
- The university also maintains a list of testing resources available in the area for the campus community. Local healthcare providers will provide diagnostic testing as available.

3. **Quarantine and Isolation:** Mansfield University has established a quarantine procedure to protect individuals that are exhibiting symptoms of COVID-19 and a self-isolation protocol for individuals that have tested positive for the virus. Individuals who have been exposed to a confirmed COVID positive case or has tested positive for the COVID-19 virus will be required to compete their quarantine/isolation period off-campus. Mansfield University is unable to provide isolation and quarantine services during the fall 2021 semester.

4. **COVID Alert PA App:** The Mansfield University community should download the [COVID Alert PA app](https://www.covidalertpa.org) to their personal mobile device. This secure application is the official mobile app that includes an Exposure Notification system and a daily wellness check.

5. **County/regional Status Change:** Should the surrounding county or region experience a surge in COVID-19 cases, the university will take additional steps to inform the campus population and implement additional safety and mitigation measures to prevent spread among the campus population. The university will follow the guidance of local public health officials and state agencies when determining if the rate of infection within the county and/or region places the campus community in a greater position of risk that may necessitate reducing the campus population.

**Section 4: Communicating with the University Community**

The university will continue to communicate with all employees and students throughout the semester using official information of record and communication channels (email, phone, and text) applicable to the notification. Print and digital signage will be used within buildings providing additional information, infographics, and facts on COVID-19. Communications and signs will reinforce practices supporting an environment conducive to healthy, safety, and inclusive learning including, but not limited to, hygiene, sanitation, face coverings on campus, and social distancing interventions.

In the event of a time-sensitive emergency, Mansfield University will utilize MU Mobile Alerts to send SMS text messages to mobile phones and voicemail messages to mobile and landline phones to every registered user with a mansfield.edu account and any additional designees of that user. Emergency information will also be communicated through email messaging to students and employees, official university social media accounts, and a prominent banner on the mansfield.edu website. Mansfield University will post a COVID-19 Dashboard on the COVID website, which will contain the numbers of confirmed cases of COVID-19 affecting university students and employees. This dashboard will be updated weekly at a minimum, and more often as required.

**Section 5: Coordination with Local Public Health Officials**
Mansfield University has, and will continue to, coordinate with officials representing local and regional Departments of Health (Wellsboro and Williamsport) and Emergency Management (Mansfield Borough and Tioga County) officials. Regional health and emergency officials will assist the university in communicating and responding to local or regional outbreaks, quarantine and isolation, as well as the availability of testing and contact tracing resources. Regional health and emergency officials will also assist the university in resource sharing in the event of an outbreak, including clinical and mental health services. Regular contact with officials will continue as the university monitors the status of infections in the state, region, and local area. Scheduling of vaccination clinics, once available, will also be coordinated through these resources.
